### Training Mats for Popular International Robotics Competitions and Systems

Why wait for your competition mat each year to begin to train your rookies or build the skills of your current team members? You can start today with our universal training mats. They provide every scenario required to teach all the fundamentals of NXT/RX/3 programming and similar robotics systems. Use them to design your own missions and exercises.

### How to Purchase Robot Mats

- SHIPPING:** Production and shipping time is typically 6-8 days.
- METHOD:** All orders are shipped FEDEX Ground or USPS within the US and Canada.
- SCHOOLS:** If you are school or organization that must use a purchase order, just forward the PO with a check for the full amount. You can email it to [sales@robotmats.com](mailto:sales@robotmats.com) or fax it to 443-307-0094 and then mail a check. When your payment has been received, we will ship the mat(s). **OR:** Schools can go to the online store and create an account which will allow you checkout with a PO. <http://store.robotmats.com>
- INTERNATIONAL INQUIRIES:** International orders can be fulfilled using local production partners. Please email your request to [sales@robotmats.com](mailto:sales@robotmats.com). We will quote you postage and estimated costs based on current currency exchange rates. We typically use providers within your region to reduce shipping costs.
- BULK ORDERS:** Discounts are available for orders of five or more mats (any combination). Please contact us to discuss your order.

### US, AK/HI, & Canada Pricing Grid for POs updated 9/17/17

Postage is calculated at checkout. You can estimate the postage on the RoboMats store.
